EXPERIENCE

Product Developer
Lisam Systems   **July 2020 - Present, Bryan, TX**

· Lead developer for Lisam America, developing projects worth over $100K in annual revenue.
· Use C# and .NET to build custom integrations and features based on customer requests.
· Designed and implemented a Python program that automated data extraction from thousands of PDF files, Word Docs, and JPEG photos, reducing manual processing time by 66%. This solution not only improved efficiency but also increased our margin on those projects by over 55%.

Cross-Platform Mobile Developer
Private Startup   **July 2022 - Present, Remote**

· Work on all aspects of a cross-platform mobile app, collaborating with a small team to build out many features.
· Utilize Flutter framework with a Firebase noSQL backend and Cloud Function automations.

Web Developer
Freelance   **January 2021 - Present, Bryan, TX**
· Maintain and redesign websites using WordPress and SquareSpace.

PROJECTS

Crowd-Sourced Fitness App
School Project   **March 2022 - May 2022**
· Utilized Expo, ESLint, Jest, Firebase, and Github Actions for continuous integration.

BCS Real Estate Website
Personal Project   **January 2022 - May 2022**
· Built with Next.js, Jest & Enzyme, ESLint, CSS Modules, Axios, and Nodemailer.

Rental Search Application
Personal/School Project   **July 2021 - September 2021**
· Built a single-page application using React, Axios, and Bootstrap.

Finance Application
Personal Project   **May 2021 - August 2021**
· Utilized the MERN (MongoDB, Express, React, Node) stack along with Material UI, Redux, and Axios.
